INVESTMENT PROPOSALS

The FEZ "Bălți" is designed as an economic area under the law of the Republic of Moldova to facilitate the economic development by attracting investment capital. For this purpose, special favorable terms similar to tax and customs facilities have been created. Due to these incentives, as well as due to the favorable geographic location of Moldova providing an exceptional investment platform with opportunities to export to EU and CIS countries, many foreign manufacturing companies are interested in extending their production capacities in Moldova. It increases the demand for ready-to-use production halls for quick production start, but also demand for development of build-to-suit (BTS) projects. The Greenfield in the City of Ștefan Vodă is located on 8.9 hectares of free buildable area, which allows implementing the industrial and logistic real estate development projects.
